ADVANCED MACHINING SOLUTIONS

CellCon
CELLULAR CONCEPTS

One Source for All your Machining Needs

U.S. Equipment Co. provides engineered Turnkey machine solutions. If you have a machine that requires rebuilding, retooling or modifications, U.S. Equipment Company will bring it up to date, including the design and installation of new electrical, hydraulic and mechanical components. We also buy & sell production machinery and manufacturing lines. Plant liquidations and appraisals are additional services offered by U.S. Equipment Company.

Roto-Flo manufactures new and remanufactured Turnkey Spline and Thread rolling machines. Our Spline & Thread rolling systems are fully integrated machines with the latest programmable controllers and diagnostic systems to produce cold formed splines, grooves, worms and threads.

Website: www.roto-flo.com

Cellular Concepts (CellCon) manufactures New 3-axis machining modules and machining centers. These modules can be incorporated into highly flexible self contained machining systems, including "Flexible Rotary Cells" and "Linear Transfer Lines". Website: www.cellcon.com
