

### Merrifield Machinery Solutions:

#### Providing Innovative Machine Tool Solutions and World Class Service

Merrifield Machinery Solutions has been delivering Machinery Solutions to Michigan's largest manufacturers and innovative machine shops since 2006. They sell and support World Class CNC Machine Tools and have been helping customers make sound capital investments, control costs and extend the life of equipment to meet production demands. The companies they represent are among the best in the world, but even when any machine tool is utilized the way it's supposed to be, it will eventually need service and repair. Merrifield has that covered, too. Their Service Department, which boasts 18 full-time trained technicians, may very well be the best reason to purchase your next machine from them! With a 14,000 square foot facility in Pontiac, MI, complete with a 30-ton crane, MMS performs complete machine refurbishments, total rebuilds, as well as multi-axis head repairs.

With specialists in mechanicals, electronics, controls/retrofits, and metrology/geometry, they can offer the highest level of service in the state of Michigan. Their services include everything from small machining centers to large boring mills, 3 and 5+ axis machines, electrical diagnostics and repair, and much more.

The machine lines Merrifield sells include SNK, Yama Seiki, Nigata, Awea, Goodway, SNK Nissin, C.R. Onsrud, Samag Group and Fooke. Merrifield is also an authorized dealer for Heidenhain and Centroid controls and components.

**OEMs everywhere are increasingly depending on their supply chains to make more challenging precision components in all types of tough materials, and at a competitive price.**

It's a demanding environment. As a solution, many of these shops are installing Mitsui Seiki horizontal and vertical 4- and 5-axis CNC machining centers. Why? Capability. Cost. Reliability. They know they need the most precise machine they can buy. They understand how our hand scraping gets them the absolute best volumetric accuracy. They know our machines are designed and built so well they get more life out of them – typically four times longer than most other brands. Robust construction techniques and materials, along with heavy duty components, provide the rigidity and ruggedness they need – from the first roughing operations to the final finishing cuts. They experience our support organization, and recognize what a difference this makes in maintaining their business. For these shops, it just makes the most profitable sense to buy the best made machine tool to get the best made parts. To compete now and in the challenging years ahead, doesn't it make sense for your shop, too? Invest wisely, and look for low operating costs with high returns. Take a closer look at Mitsui Seiki. Contact us today.
