**WHEN GOOD ENOUGH
IS NOT GOOD ENOUGH**

OEMs everywhere are increasingly depending on their supply chains to make more challenging precision components in all types of tough materials, and at a competitive price.

It's a demanding environment. As a solution, many of these shops are installing Mitsui Seiki horizontal and vertical 4- and 5-axis CNC machining centers. Why? Capability. Cost. Reliability. They know they need the most precise machine they can buy. They understand how our hand scraping gets them the absolute best volumetric accuracy. They know our machines are designed and built so well they get more life out of them – typically four times longer than most other brands. Robust construction techniques and materials, along with heavy duty components, provide the rigidity and ruggedness they need – from the first roughing operations to the final finishing cuts. They experience our support organization, and recognize what a difference this makes in maintaining their business. For these shops, it just makes the most profitable sense to buy the best made machine tool to get the best made parts. To compete now and in the challenging years ahead, doesn't it make sense for your shop, too? Invest wisely, and look for low operating costs with high returns. Take a closer look at Mitsui Seiki. Contact us today.

When Good Enough is **Not** Good Enough.
