

USED EQUIPMENT FOR SALE:

4" Kuraki Horizontal Boring Mill with 4th Axis Table
KURAKI Model KBM-11A
New 1998
\$279,500

Okumua Heavy Duty 25" Pallet 2-Pallet HMC
OKUMA HOWA Model Millac 630H
New 2005
\$210,000

37" Timesaver 137-1HDMW Wet Belt Grinder
Model 137-1HDMW
New 2001
\$29,500

Chevalier FM-3VKH 2-Axis CNC Knee Mill
New 1993
\$11,500

4" Nomura Horizontal Boring Mill with 4th Axis Table
NOMURA Model HBA-100T-R3
New 1998
\$269,000

AWEA SP-3016 CNC Bridge VMC
AWEA Model SP-3016
New 2000
\$189,500

Mazak Integrex E-1060V/8ii 5-Axis Mill Turn Machine
MAZAK Model Integrex E-1060V/8ii
New 2009
\$810,000

25"x120" Toolmex Engine Lathe Model TUR630A
New 1996
\$33,000

Yang MV-3A Box Way Geared Head CNC VMC
YANG Model MV-3A
New 1995
\$23,500

5"x12" Myford Precision Cylindrical Grinder
Model MG-12 HAR
New 1981
\$22,500

Front / Rear Chucks, Threading and Taper Attachments
New 1976
\$89,500

#2 OMV Cincinnati Milacron Centerless Grinder
New 1990

Industrial Times

Industrial Times

The first thing to wear out on a CNC machine is often the drawbar!

Belleville springs hold the arbor in the spindle during cutting AND they are often the first thing to wear out on a CNC Machining Center. Just one broken spring has a huge effect on clamping force. Chatter, low tool life, poor finishes, less repeatability, and scrap parts are the result.

Eventually a tool may pull out during a cut, causing major damage to the machine and spindle.

Machines are never the same after a crash

A typical drawbar assembly

Test CAT, BT, ISO, HSK, CAPTO and others

Drawbars seldom get the attention they deserve. Checking it requires a specially designed tool. The Clamprite Gage simulates a tool in the spindle, reads directly in pounds of force, and checks your drawbar in less than a minute.

Thousands of shops in the U.S. and around the world use the Clamprite Gage.

Customers say "it paid for itself the first time we used it"

CLAMPRITE® Spindle Drawbar Force Gage

Protect Your Spindles

Avoid Unscheduled Downtime

Increase Cutter Life

Accuracy
Traceable to
NIST

Works with all types of pull studs

The Clamprite Gage is the most economical tool for checking the drawbar force of your machine. Kits are furnished in a metal tool box with tray, and a foam fitted liner to protect the gage head.

Select your kit by spindle type and maximum drawbar force you will be testing. Go to www.clamprite.com for more information.

Find out if your drawbars still Clamprite. Call today!

Downstream Production Equipment For the Pipe, Profile, and tubing Industry

PUSH IT, PULL IT, MOVE IT...

For over 50 years, Versa Machinery has been producing Pinch Roll and Caterpillar Puller / Feeder assemblies in a variety of belt widths and traction lengths. The Puller / Feeders can be adapted and built into process machines that require product movement. Provide your own motor and drive package, or Versa Machinery can configure one for you. Save design time and money by using off-the-shelf Puller / Feeder assemblies.
